Subject: West Lake Landfill: draft PowerPoint for June public meeting on the H: drive for review

Filename "West Lake June 2013 Public Meeting.pptx" in H:\REGION SHARE\West Lake Schedule Tracker\Public Meeting Presentations

I did not put in a slide for USGS or other presenters as I'm not sure what their role will be yet.

I tried to weave in the questions we've been getting but most of them didn't really fit. I put a list of them in the Notes for the second slide (Agenda) so we can discuss how we'll respond. Many of the responses are already drafted on the H: drive but we haven't used them yet. If there are other questions we should anticipate and be ready for, feel free to add them.

See also the Notes for slide 11 (Aspect Gamma Scan Results); based on the TV interview with Dawn Chapman yesterday, we'll need to explain why we did the ASPECT flight.

At the January meeting, we had poster-sized figures showing the groundwater results – do we want to do that again? If so, we'll need a new Task Order with TetraTech and a short turnaround for them to make the figures after we get the data.

Principles and integrity are expensive, but they are among the very few things worth having.
